**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/26/2007 has been entered.

### ***Response to Arguments***

2. Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection. Upon further consideration, the previous indication of allowability of claims 14,15,18 is hereby withdrawn. See ¶6.

### ***Claim Objections***

3. Claim 19 is objected to because it is dependent upon a cancelled claim. Appropriate correction is required.

***Allowable Subject Matter***

4. Claims 16,17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10,13,14,15,18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osako USP 5,678,813 in view of Boss USP 6,612,559.

Osako discloses an apparatus comprising:

- A first conveying section (111) of a conveying track a saddle-shaped support and a wire-stitching section (114) (fig.9)
- A second conveying section (117) of a conveying track
- A fold feeder (119) positioned upstream of the adhesive applicator
- an adhesive applicator (123) positioned in an extension region of the second conveying section (117), upstream of a delivery region (124)

Osako does not expressly disclose an endless intermediate conveyor positioned

Art Unit: 3651

near an end of the first conveying section and in alignment with the second conveying section or comprising an endless traction mechanism or grippers attached thereto at regular intervals.

Boss teaches the use of an endless intermediate conveyor (10) positioned near an end of the first conveying section (3) and in alignment with the second conveying section (8) and comprising an endless traction mechanism and grippers (22) attached thereto at regular intervals for the purpose of safely guiding printed products from one conveyor chain to another (C2/L66-C3/L20).

At the time of invention it would have been obvious to one having ordinary skill in the art to employ an endless intermediate conveyor positioned near an end of the first conveying section and in alignment with the second conveying section and comprising an endless traction mechanism and grippers attached thereto at regular intervals, as taught by Boss, in the device of Osako, for the purpose of safely guiding printed products from one conveyor chain to another.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie A. Nicholson III whose telephone number is 571-272-5487. The examiner can normally be reached on M-F, 8:30 AM - 5 PM.
